

Re-Enchanting the World A Day of Regeneration and Repair at the Feed4Food Strovolos Living Lab

The Feed4Food Strovolos Living Lab at Acropolis Park was delighted to host a full day of regenerative activities on Saturday 14 March 2026. The gathering brought together a diverse constellation of grassroots initiatives, practitioners, families, and communities of care, forming a living example of how ecological, technological, and social practices can converge in meaningful ways.

The event was organised through a process of open collaboration and broad mobilisation, with input and participation from local initiatives working across regenerative agriculture, digital rights [Cyprus Free/Libre and Open-Source Software Community (ELLAK Cyprus)], education, and community wellbeing (Smartphone Free Childhood Cyprus).

Throughout the day, activities were designed to be accessible to all ages, encouraging participation, learning, and shared experience:

- A permaculture workshop introducing core principles of earth care, people care, and fair share
- A Repair Café in the caves of Acropolis Park
- Chess and frisbee activities, including participation from the Nicosia Ultimate Frisbee community
- A shared potluck meal and evening celebration
- A discussion circle on “Organising for Peace”.
